

AMENDMENTS TO THE CLAIMS:

1. (Currently Amended) A portable table assembly comprising:
a plurality of table ~~platform~~ units; and
said table units configured to be a ladder, whereby the plurality of platform units are assembled together and mounted to and supported by a generally horizontally positioned the ladder.
2. (New) The table units of claim 1 further comprising a platform, a rear support and a front support.
3. (New) The table units of claim 2 further comprising one or more of orifices, at least one of said orifices configured for receiving a securing bolt inserted through it.
4. (New) The rear support of claim 2 further comprising one or more slotted orifices, at least one of said orifices configured for receiving a securing bolt inserted through it.
5. (New) The front support of claim 2 further comprising a one or more slotted orifices, at least one of said orifices configured to receive a securing bolt inserted through it.
6. (New) The portable table assembly of claim 5 wherein said slotted orifice is configured to allow adjustment in the position of the rear support and the forward support to accommodate insertion into different sized ladders.
7. (New) The portable table assembly of claim 3 wherein the table unit serves to receive construction material.
8. (New) The portable table assembly ladder of claim 1 wherein the ladder is elevated off the ground by saw horses.
9. (New) The portable table assembly claim 1 wherein the ladder is elevated off the ground by one or more adjustable or foldable legs.

10. (New) A table device comprising:
- a plurality of table components, each component comprising:
 - a table surface piece; and
 - at least two legs, wherein each of the legs are configured to be received by side rails of a ladder.
11. (New) The device of claim 10, wherein the legs are hingedly attached to the table surface piece.
12. (New) The device of claim 10, further comprising a pin connection device for coupling the legs to the top surface.
13. (New) A portable table comprising:
- one or more table components, wherein the one or more table components include:
 - a table surface piece; and,
 - at least two legs coupled to the table surface piece,
 - wherein the legs are configured to be supported by a generally horizontally positioned ladder.
14. (New) The table of claim 13, further comprising at least two ladder support structures.
15. (New) The table of claim 13, wherein the legs are hingedly attached to the table surface piece.
16. (New) The table of claim 13, further comprising a pin connection device for coupling the legs to the top surface.
17. (New) The method of inexpensively constructing a portable table comprising
- connecting multiple portable platforms,
 - positioning a ladder to receive the portable platforms,
 - wherein, the ladder is adapted into a working table in order to accommodate a machining tools.
